REPORT FROM THE BOARD OF DIRECTORS 2024 FOR AIDER KONSERN AS

Aider Konsern AS is a holding company for companies that provide accounting, advisory services and related IT-services. The company's address is Karl Johans gate 37, 0162 Oslo.

The company mainly invests in other companies that provide accounting, advisory and technology services to customers who outsource all or part of their finance function.

Comments related to the financial statement

Aider Konsern AS had an annual result of TNOK -38 337 (compared to last year of TNOK -10 038) and a balance of TNOK 2 249 178 (compared to last year of TNOK 1 191 910). The equity ratio was 19,7% (compared to last year of 7,1%).

The group had an annual result of TNOK -55 045 (compared to last year of -642) and a balance of TNOK 2 902 566 (compared to last year 1 604 365). Revenue was TNOK 1 339 606 (compared to last year of 838 458). The equity ratio was 21,3% (17,3% % in 2023).

Underlying operations have been good throughout the year, but processes related to acquisitions and integrations, as well as the process in establishing a strategic partnership resulted in one-off costs that have negatively affected the annual result.

2024 has been a year where we have continued the significant growth from 2023. Aider counts 1 271 people end of 2024 compared to 812 end of 2023. Aider has clearly strengthened its brand nationally and locally through acquisitions of well reputed accounting firms throughout Norway.

Aider is experiencing an explosive growth in M&A activities. In total, Aider has made 29 acquisitions in 2024. As many as 13 acquisitions have been completed in Q4 2024, compared to 7 in Q4 2023. Acquired companies are consolidated from the accounting period when Aider controlled the shares. As the accounting business is somewhat cyclic with higher earnings in first half and most of the acquisitions are closed in the second half, the effect is that the underlying margins proforma are higher than reported margins in the financial statement. There was substantial costs related to M&A and post-merger activities and establishing a strategic partnership and refinancing the bond. Cost related to special items are at NOK 44,8 million up from NOK 19,5 million in 2023, where M&A and integration were NOK 22,1 million and cost related to establishing a strategic partnership and bond refinancing were NOK 22,8 million. Consequently, management is happy to deliver a proforma EBITDA margin according to guiding, even with substantial internal improvement project as well as M&A activities well above plan.

Net financial items have had a significant increase from NOK -76,8 million in 2023 to NOK -168,9 million in 2024 for the group, mainly due to the refinancing of the old bond as well as increase in interests from the new bond obligation.

The cash flow from operating activities for the group in 2024 is NOK -61,8 million (compared to NOK 19,6 million in 2023). The main reason for the decrease in cash flow is increase in interests and refinancing of from the new bond, as well as special items from the transaction of establishing a strategic partnership. Cash flow from investments are NOK -954,4 million. The cash flow from financing activities are supported by the obligation refinancing of the old bond and a capital increase by conversion of debt from the parent company.

Bond reporting

In August, Aider issued a new bond of MNOK 1.600. This replaces the previous bond of MNOK 875. The new bond has an interest rate of 4,15% + NIBOR which in a significant improvement from the previous bond of 6% + NIBOR. Furthermore, the new bond offers more flexibility with regards to other financing facilities. The new bond will be the main source of financing the M&A strategy going forward. In relation with the bond, the Group must have the higher of MNOK 50 or 5% of the aggregate outstanding nominal bond amount in free liquidity at any time in. Aider complies with this covenant requirement.

Plans and guiding for 2025

Aider's vision is:

"We are redefining the accounting industry by building a house of competence"

Aider is a vision- and value-driven company. The vision guides all priorities.

Aider will continue to grow rapidly. The high level of M&A activity in 2024 is planned to be sustained at the same level in 2025. Also, organic growth is expected to continue at the same high levels.

The possibility for realizing synergies increases as Aider grows. The return of investments from automation/AI, smarter work processes, software etc. will be higher as the customer base is larger. Consequently, EBITDA-margin is expected to increase in 2025. Aider will continue to develop complementary advisory services including further strengthening the tech offering.

On October 21st 2024, Aider announced a change of control event where Castik Capital were to acquire approx. 55% of the shares in the Group. Closing of the transaction was completed 15th of January 2025.

Having Castik Capital as a strategic financing partner will greatly improve Aider's ability to fund growth going forward as Castik Capital can support strategic investments by issuing of equity. However, the bond financing will be the primary tool for financing "ordinary" M&A activities in the future.

Aider has started a strategy process with the new board. However, the vision, values and culture of the company will remain the same. Topics for discussions are:

- Aider will continue to develop the no.1 position in the Norwegian market, and continue to strengthen local presence to better serve local businesses as well as attract local talents
- Aider will expand the business Nordic and beyond
- Aider will invest in technology like automation/AI, and insight
- Aider will develop wider service scope
- Aider will be the most recognized brand in the industry
- And most importantly, Aider will continue to develop the “People First” culture, where employees get an unrivaled opportunity to develop and grow

*) Transfers of Undertakings (“virksomhetsoverdragelse”)

M&A is a long-term endeavor where the high level of activity is a result of relationships and trust built over a long period of time.

Organic growth

Organic growth is a strategic focus area for the Aider management. Being attractive to new customers and new talent is essential for long-term success. 2024 has been a formidable in this respect, with an organic growth of 15,2 % for the year.

Aider has throughout 2024 strengthened its recruitment capabilities, both internally as well as externally. This has greatly paid off, and Aider was able to hire 239 people in 2024, of which 61 was student hires of master and bachelor candidates. Aider counts 1 271 people end of 2024 compared to 812 end of 2023.

Aider is experiencing to continue its organic growth through new customers and projects. We see a shift in the market, where increasingly larger companies are contacting Aider for our services. Many of these companies have internal accounting departments and are therefore an exciting new segment for further growth. This is also supported by industry surveys which show that the market is growing rapidly and that it is particularly the large, professional accounting firms who absorbs much of the growth.

Central risks and uncertainties

All accounting firms are subject to regulations on risk management and internal control. The board has a focus on this work in relation to risk assessment and follow-up on risk-reducing measures.

The board does not perceive the risk picture to have changed significantly through 2024 and has particularly focused on the following risk areas:

- Growth risk
- ICT risk
- Money laundering risk
- Financial Risk

Growth risk

Aider is growing rapidly, both organically and through acquisitions. With 239 new hires in 2024, there is continuously joining new people who are not familiar with the company's quality procedures and guidelines. Aider therefore focuses on on-boarding new companies and individuals through:

- Further developing and improving methodology and documentation for acquisition processes
- Developing, improving and strengthen the national and regional quality organization
- The head of quality reports to the board and ensures that quality work is well illuminated in the board's discussions
- A cross-functional project team is set up to ensure all aspects of on-boarding including the implementation of quality procedures
- Significant investment has been made in further developing training programs for new hires, including national meetings, written procedures, online courses, and more.
- A personal mentor is appointed to help clarify questions for all new hires

ICT risk

Aider delivers important technology to our customers. This is an area where major changes are taking place. This makes monitoring ICT risk an important part of Aider's risk work. To handle this, Aider has built up a strong tech team of about 112 people where ICT risk work is also managed to ensure good expertise and coordination. Aider has chosen not to do IT operations itself, but through partners. This means that we share risk, expertise, and control measures with subcontractors related to operational activities.

Money laundering risk

The board experiences that the Financial Supervisory Authority's expectations related to anti money laundering procedures are increasing. The board has taken this into account through several measures. Among other things, adjustments to the quality systems have been made to make it easier to collect documentation and perform assessments in one place.

The board have appointed a money-laundering responsible at group level for Aider AS. Additionally, the regional quality managers have been delegated responsibility for supervising the money-laundering activities in their regions. The company has also appointed a separate money laundering compliance responsible.

Financial risk

At the end of 2024, the group had a long-term loan of MNOK 1 566. In addition, the group has established a revolving credit facility of MNOK 45 to secure liquidity and increase flexibility in daily operations. The group entered in a new agreement with the bank in 2025 to increase its revolving credit facility to 10% of revenue. In addition, the companies in the group are organized in a group account arrangement to ensure liquidity for each company. Cash flow from operations covers the short-term obligations and is continuously monitored by the board.

In 2024, Aider chose to refinance its obligation loan and issued a new loan of MNOK 1 600. The proceeds were used to redeem the old bond and further strengthen the cash for M&A-purposes. This provides greater flexibility for investments.

The Board's assessment is that the company and the group are well capitalized and have a good liquidity situation, both as of December 31, 2024 and going into 2025.

Events after the balance sheet date:

The shareholders in Aider Konsern AS's parent company Aider Group AS finalized and closed the transaction with Castik Capital for the sale of shares of approximately 55% on January 15th 2025.

Going concern:

The financial statements for 2024 have been prepared on the going concern assumption and, in accordance with Section 3.3a of the Accounting Act, the Board confirms that the going concern assumption is appropriate.

Research and development activities

The company has undertaken several development projects in its service areas of IT, accounting, and payroll production, including robotic projects and customer applications. CAPEX in 2024 was NOK 43,2 million, with a total of NOK 80,8 million being capitalized as of December 31, 2024.

Directors' liability insurance

The company has director's liability insurance at group level, which also covers the board of Aider Konsern AS.

Statement of Social Responsibility

Working environment

The sickness absence rate in the group was approximately 4.7% throughout 2024. This is the same lever as 2023 and is considered acceptable. However, active efforts to keep sickness absence down are an ongoing measure at Aider.

There have been no reported or occurring work-related accidents or injuries, neither to personnel nor materials.

Flexibility regarding workplace has been practiced so that all employees have had the opportunity to work from home during periods where it has been most appropriate.

Gender equality

At the end of the year, the group had 1 271 employees, of whom 780 were women (61.4%). The proportion of women in management positions is 46,8%. Management positions are defined as positions with specific responsibility for a service area or department.

There is no discrimination in pay or other ways between genders. Equal work and responsibilities should be remunerated equally at Aider.

Measures to prevent discrimination, etc.

Aider is aiming to recognize people as unique individuals that are different, with different dreams and ambitions, and differences in what ideal career path should look like. Also, we know that diversity does not create value by itself, and can even be a source of complexity. However, diversity done right will generate new ideas, better business solutions, and a more vibrant workplace. We care deeply about providing equal opportunities for all, and leveraging different strengths, competencies and perspectives to create value, and to put People First

Aider has established reporting procedures to detect unwanted incidents and prevent discrimination, etc. Recruitment processes always involve several people to ensure that multiple candidates are evaluated, and any personal biases are eliminated. Finally, calibration of salary and promotion to leadership positions is done at regional/national level to more easily detect any systematic imbalances in remuneration, opportunities for promotion, etc.

Environmental impact

Moving toward a more sustainable future is a necessity, and Aider takes this responsibility seriously. In order to help track the Group's ESG metrics the board has chosen to prepare an updated ESG report for 2024 for the Aider group based on the CSRD framework.

Being a professional services firm, the environmental impact of the company and group's core business is rather low. Aider does, however, recognize the opportunity and responsibility of helping our customers to create profitability in new and circular business models, and ensuring a competitive sustainable transition.

Aider has joined Accounting Norway's Sustainability Council (Regnskap Norge Bærekraftsforum).

The Transparency Act and responsible sourcing

Aider is committed to making sure we contribute positively to local and civil society. While we have always put quality and safety highly when choosing our suppliers, this year we have conducted more rigorous due diligence assessments in accordance with the OECD Guidelines in order to get a better overview of any risks in our supply chain, and to comply with the transparency act.

This due diligence covers a wide array of topics including practices related to Human Rights, Labour, Environment, anti-corruption and more. We used the software provider Factlines to conduct this assessment and have been scored as a low-risk supplier ourselves, as well as having a low-risk supply chain overall. We have not identified any significant risks, but there are some identified lesser risks regarding non-codified ethical standards which we will follow up..

Further information regarding this work will be published on:
www.aider.no/apenhetsloven by 30.06

Statement on the annual accounts and appropriation of profit

The board of Aider Konsern AS proposes that the year's deficit of TNOK 38 337 be transferred from other equity.

NOTES TO CONSOLIDATED FINANCIAL STATEMENT

AIDER KONSERN

NOTE 1 – ACCOUNTING PRINCIPLES

General information

Aider Konsern (the group) consists of Aider Konsern AS (the company) and its subsidiaries. The head office is located at Karl Johans gate 37, 0162 Oslo.

Aider Konsern's consolidated statements for 2024 were authorized for issue by the board of directors on April 30th, 2025.

Basis for preparation

Aider Konsern AS's consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and mandatory for accounting periods beginning on or after January 1, 2021, and with Norwegian disclosure requirements under the Norwegian Accounting Act as of December 31, 2024.

The consolidated financial statements are based on the principles of historical cost accounting, except for the following accounting items:

- Financial instruments at fair value through profit or loss and financial instruments through other comprehensive income and expenses
- The consolidated financial statements have been prepared using consistent accounting principles for similar transactions and events under otherwise similar circumstances.

Financial instruments at fair value through profit or loss and financial instruments through other comprehensive income and expenses.

Changes in accounting policies and notes

No changes in IFRSs relevant to the 2024 financial statements have been made in the current year.

Consolidation principles

The consolidated financial statements comprise the financial statements of the parent company and its subsidiaries as of December 31, 2024. An entity is considered to be controlled by the group when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Therefore, the group controls an entity in which it has invested if, and only if, the group:

- has power over the entity
- is exposed to, or has rights to, variable returns from its involvement with the entity
- has the ability to use its power over the entity to affect its returns.

If the group has a majority of the voting rights in an entity, the entity is presumptively a subsidiary in the group. To support this presumption and where the group does not hold the majority of the voting rights, the group considers all relevant facts and circumstances to evaluate whether the group controls the entity in which it has invested. This includes, among other things, ownership percentage, voting percentage, ownership structure and relative strength, as well as options controlled by the group and shareholder agreements or other agreements. See note 9 for a more detailed description of the group's assessments related to the control concept.

Assessments are made for each investment.

The group performs a reassessment of whether it controls or does not control an entity when facts and circumstances indicate that there are changes in one or more of the control elements.

The acquisition method is used in accounting for business combinations, see note 15. Subsidiaries are consolidated from the date the group obtains control and are deconsolidated when control ceases.

The result, as well as each component of other comprehensive income and expenses, is attributed to the group and to non-controlling interests, even if this results in a loss for the non-controlling interests. If necessary, the subsidiaries' financial statements are adjusted to comply with the group's accounting policies. Intra-group transactions and balances, as well as gains and losses arising from transactions between the companies, are eliminated. Non-controlling ownership interests are presented on a separate line within the equity section of the consolidated balance sheet.

Change in ownership percentage without loss of control

Changes in ownership percentages in subsidiaries that do not result in loss of control are recognized as equity transactions. The consideration is recognized at fair value, and the difference between the consideration and the carrying value of non-controlling interests is recognized against the controlling owners' equity.

Loss of control

In the event of a change in ownership percentage that results in loss of control, the consideration is measured at fair value. The carrying values of the assets (including goodwill) and liabilities in the subsidiary and non-controlling interests are deducted at the time control is lost. The fair value of the consideration received, less the carrying values of the liabilities in the subsidiary and non-controlling interests at the time control is lost, is recognized. Any remaining ownership interest is measured at fair value, and any gain or loss is recognized in the income statement at the time control ceases.

Business combinations

The acquisition method is used for accounting for business combinations.

Acquired assets and liabilities in connection with business combinations are measured at fair value at the acquisition date. The company is consolidated from the point at which the group gains control and is excluded from consolidation when control ceases. Costs related to acquisitions are expensed as they are incurred. Non-controlling interests are calculated based on the non-controlling interests' share of identifiable assets and liabilities or at fair value. The choice of method is made for each individual business combination.

Goodwill is calculated as the sum of the consideration and the accounting value of non-controlling interests and the fair value of previously owned equity interests, less the net value of identifiable assets and liabilities calculated at the time of acquisition. Goodwill is not amortized but is tested for impairment at least annually.

Goodwill is allocated to the cash-generating units that are expected to benefit from the acquisition synergies, regardless of whether other assets and liabilities in the acquisition are attributed to these cash-generating units. If the fair value of the net assets in the business combination exceeds the consideration (negative goodwill), the difference is recognized as income immediately at the acquisition date.

Use of estimates

The management has used estimates and assumptions that have affected assets, liabilities, revenues, expenses, and disclosure of potential obligations. This applies in particular to depreciation of fixed assets, impairment of goodwill, valuations related to acquisitions, and pension obligations. Future events may cause the estimates to change. Estimates and their underlying assumptions are assessed on an ongoing basis and are based on best judgment and historical experience. Changes in accounting estimates are recognized in the period in which the changes occur. If the changes also relate to future periods, the effect is distributed over the current and future periods.

Assessments

In the preparation of the annual financial statements, management has made certain significant judgments based on critical estimates related to the application of accounting principles. The following notes cover the company's assessments:

- Control over a company, note 12
- Lease agreements, note 5
- Revenue from contracts with customers, note 3
- Financial instruments, note 21.

Currency

The presentation currency of the group is NOK, which is also the functional currency of the parent company. Companies with a different functional currency are translated to the balance sheet date exchange rate for balance sheet items, including goodwill, and to the transactional exchange rate for income statement items. Monthly average rates are used as an approximation of the transactional exchange rate. Translation differences are recognized in other income and expenses. Upon loss of control, significant influence or joint control, accumulated translation differences related to investments attributable to controlling interests are recognized in profit or loss. Upon partial disposal of subsidiaries (not loss of control), the proportional share of accumulated translation differences is attributed to non-controlling interests.

Revenue

Revenues consist primarily of accounting services, sales of system services, and other financial advice.

Revenue from contracts with customers is recognized when control over a good or service is transferred to the customer, and in the amount that reflects what the Group expects to receive for the good or service. The Group has concluded that it is a principal in its revenue streams because it controls the goods and services before they are transferred to the customer.

Segments

For management reporting purposes, the Group is organized into different business areas based on their activities, and the Group consists of 3 reporting segments. Further information about the different segments and related financial information is presented in Note 3.

Tax

The tax expense in the income statement includes both the current payable tax and changes in deferred tax. Deferred tax is calculated at 22% based on temporary differences between accounting and tax values, as well as tax loss carryforwards at the end of the accounting year. Tax-increasing and tax-decreasing temporary differences that reverse or may reverse in the same period are offset and netted. Net deferred tax assets are recognized to the extent it is probable that they can be utilized. An asset for deferred tax is recognized when it is probable that the company will have sufficient taxable profits in future periods to utilize the tax benefit. The companies recognize previously unrecognized asset for deferred tax to the extent it has become probable that the company can utilize the deferred tax benefit. Similarly, the company will reduce the asset for deferred tax to the extent it no longer considers it probable that it can utilize the deferred tax benefit.

Deferred tax assets and liabilities are measured based on the expected future tax rate for the companies in the group where temporary differences have arisen. Deferred tax assets and liabilities are measured at nominal value and classified as long-term liabilities (non-current assets) in the balance sheet. Payable tax and assets or liabilities for deferred tax are recognized directly against equity to the extent that the tax items relate to items recognized directly against equity.

Leases

Leased operating assets are accounted for under IFRS 16 and classified as property, plant and equipment in the financial statements. The corresponding liability is included as long-term debt.

Lease payments are split between interest expense and principal repayment.

Classification of assets and liabilities

The Group distinguishes between current assets and non-current assets when presenting assets in the balance sheet. Similarly, short-term and long-term liabilities are distinguished.

The Group classifies an asset as a current asset when it:

- expects to realize the asset or intends to sell or consume it in the Group's ordinary operating cycle
- primarily holds the asset for trading
- expects to realize the asset within twelve months after the reporting period
- The asset is in the form of cash or a cash equivalent, unless the asset is subject to a restriction that prevents it from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as fixed assets, including deferred tax assets.

The group classifies liabilities as short-term when the obligation:

- Is expected to be settled in the entity's ordinary operating cycle
- Primarily holds the obligation for sale
- Falls due for settlement within twelve months after the reporting period

Or

- The group does not have an unconditional right to defer settlement of the obligation for at least twelve months after the reporting period.

All other liabilities are classified as long-term debt, including deferred tax liabilities.

Fixed assets

Property, plant, and equipment intended for production, delivery of goods, or administrative purposes and with a durable lifespan are classified as tangible fixed assets. These assets are measured at acquisition cost, less accumulated depreciation and impairment losses. When sold or disposed of, the carrying amount is deducted and any loss (gain) is recognized in the income statement.

The acquisition cost of tangible fixed assets includes purchase price, taxes, and expenses directly related to preparing the asset for use. Expenses incurred after the asset is put into use, such as ongoing maintenance, are recognized as operating expenses, while upgrades or improvements are added to the asset's cost and depreciated along with it. The depreciation period and method are reviewed annually. The residual value is estimated at each year-end, and changes in the estimate are recognized as an estimate change. Significant assets consisting of substantial components with different useful lives are decomposed with different depreciation periods for the various components.

Intangible assets

Individually acquired intangible assets are recognized in the balance sheet at cost. Intangible assets acquired through business combinations are recognized in the consolidated financial statements at fair value. In subsequent reporting periods, intangible assets are measured at cost, reduced by any accumulated depreciation and impairment. Internally generated intangible assets, except capitalized development costs, are not recognized in the balance sheet but are expensed as incurred. Intangible assets with a definite useful life are depreciated over their economic life and are tested for impairment when there are indications of impairment.

Goodwill and other indefinite-lived intangible assets are not depreciated but are tested for impairment if there are indications of impairment, at least annually, either individually or as part of a cash-generating unit. For indefinite-lived intangible assets, an annual assessment is made as to whether the assumption of indefinite life can be supported. If not, the change is treated prospectively as a change to a definite life. Gain or loss on disposal of intangible assets is calculated as the difference between net sales proceeds and carrying amount. Gain is recognized as "other operating income" and loss as "other operating expenses".

Research and development

Expenses related to research and development are capitalized to the extent that one can identify a future economic benefit related to the development of an identifiable intangible asset and where the acquisition cost can be reliably measured. Otherwise, such expenses are expensed as incurred. Capitalized research and development costs are depreciated on a straight-line basis over the economic life.

Write-down of non-financial assets

The group evaluates at each reporting date whether there are indications that an asset has declined in value. If such indications exist, the asset's recoverable amount is estimated. The recoverable amount is considered as the higher of fair value less costs to sell and value in use, and is calculated for an individual asset, unless the asset does not generate cash inflows that are largely independent of cash inflows from other assets or groups of assets.

An asset has declined in value when its carrying amount exceeds its recoverable amount, and in such cases, the asset is written down to its recoverable amount. The reduction is a loss on impairment, which is recognized in profit or loss. The group evaluates at each reporting date whether there are indications that an impairment loss recognized for an asset other than goodwill in prior years no longer exists or has decreased. If such indications exist, the recoverable amount of this asset is estimated, and the previously recognized impairment loss is reversed up to a maximum amount that does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized in prior years.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset for one entity and a financial liability or an equity instrument for another entity.

Financial assets

The group's financial assets are: trade receivables and cash and cash equivalents.

The classification of financial assets at initial recognition depends on the characteristics of the contractual cash flows of the asset and the business model that the group uses in managing its financial assets. With the exception of trade receivables that do not have a significant financing element, the group recognizes a financial asset at fair value plus transaction costs, if the financial asset is not measured at fair value with value changes through other income and expenses. The group classifies its financial assets as follows:

Financial assets measured at amortized cost

Financial assets measured at fair value with value changes through other income and expenses with reclassification of cumulative gains and losses to profit and loss

Equity instruments measured at fair value with value changes through other income and expenses without reclassification of cumulative gains and losses to profit and loss

Derivatives measured at fair value through profit or loss (not designated as hedging instruments)

Financial assets measured to amortized cost

The company measures financial assets at amortized cost if the following conditions are met:

- The financial asset is held in a business model where the objective is to collect contractual cash flows, and
- The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on specified dates.

Subsequent measurement of financial assets measured at amortized cost is done using the effective interest rate method and is subject to impairment losses.

Gains and losses are recognized in profit or loss when the asset is derecognized, modified, or impaired. The company's financial assets measured at amortized cost include trade receivables and other short-term deposits.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or a part of a group of similar financial assets) is derecognized (removed from the consolidated balance sheet of the group) when:

- The contractual right to receive cash flows from the financial asset expires, or
- The group has transferred the contractual right to receive the cash flows from the financial asset, or has retained the contractual right to receive the cash flows from a financial asset but has assumed an obligation to pay them to another party; and either:
- The group has transferred substantially all risks and benefits associated with the asset, or
- The group has neither transferred nor retained substantially all risks and benefits associated with the asset but has transferred control of the asset.

Financial liabilities

Financial liabilities are, at initial recognition, classified as loans and obligations. Loans and obligations are recognized at fair value adjusted for directly attributable transaction costs.

Loans and liabilities

After initial recognition, interest-bearing loans will be measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the income statement when the liability is derecognized. Amortized cost is calculated by taking into account any discount or premium on purchase, or costs and fees that are an integral part of the effective interest rate. The effective interest rate is presented as finance costs in the income statement. Liabilities are measured at their nominal amount if the effect of discounting is insignificant.

Derecognition of financial liabilities

A financial liability is derecognized when the liability is settled, cancelled or expired. When an existing financial liability is replaced with a new liability from the same lender where the terms are substantially modified, or the terms of an existing liability are materially modified, the original liability is derecognized and a new liability is recognized. The difference in the carrying amount is recognized in profit or loss.

Measurement of fair value

Fair value of financial instruments traded in active markets is determined at the end of the reporting period by reference to quoted market prices or dealer prices (bid prices for long positions and ask prices for short positions) without deduction of transaction costs.

For financial instruments not traded in an active market, fair value is determined using an appropriate valuation method. Such valuation methods include the use of recently executed arm's length market transactions between knowledgeable and willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow calculations, or other valuation models.

Cash and cash equivalents

Cash and cash equivalents include cash, bank deposits, and other short-term, highly liquid investments. The cash flow statement has been prepared using the indirect method.

Events after the balance sheet date

New information after the balance sheet date regarding the company's financial position on the balance sheet date has been taken into account in the financial statements. Events after the balance sheet date that do not affect the company's financial position on the balance sheet date, but that will affect the company's financial position in the future, are disclosed if they are significant.

NOTE 2 – GENERAL INFORMATION

Aider Konsern AS is a holding company for companies who provides accounting and advisory services. The company invests primarily in companies who delivers accounting- and technology driven services for clients outsourcing all or part of their business administration processes.

NOTE 3 – REVENUE

By segment (Amount in NOK 1000)	2024	2023

Research and development relates to solutions for automatisisation of incoming invoices for accounting systems and development of quality system. The cost occurred are identifiable, can easily isolate and will have clear economic benefits in the future.

Goodwill have arised from the transactions where Aider Konsern merged with the sister companies TET Gruppen AS and Aider AS with subsidiaries in 2020, as well as companies in note 12 and 15. Goodwill in these transactions are related to personell, knowledge of operations as an accounting firm and regulatory requirements as well as relationships.

Goodwill is tested for impairment, through valuation of the group before and after acquisition, where no indication of impairment are uncovered.

NOTE 12 – INVESTMENTS IN SUBSIDIARIES AND ASSOCIATED COMPANIES

Subsidiaries are companies over which the Group has control. Control is defined as the power to govern the financial and operating policies of another entity to obtain benefits from its activities. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date on which control ceases.

Item	31.12.24
Cash and cash equivalents	237 501
Money Market fund	256 002
Restricted cash related to payroll and acquisitions	-47 225
Overdraft facility	40 000
Free liquidity	486 279
Covenant requirement highest of MNOK50 or 5%	80 000
Over-/under coverage	406 279

Net interest bearing debt to EBITDA:

Debt Leverage	31.12.24
Interest bearing debt	1 565 753
Total interest bearing liabilities	1 565 753
Cash and cash equivalents	493 503
Net interest bearing debt	1 072 250
 EBITDA LTM*	 229 770
Net interest bearing debt to EBITDA	4.7

In ordrer for Aider Konsern to tap on the bond according to the term sheet, the covenant must be below 4.5.

**ebitda ltm is proforma ebitda last twelve months included allowed one-off adjustments (special items) and synergies under terms of agreement for the bond.*

The special items that are adjusted are the following in 2024:

Item	31.12.24
Integration of new offices and aquired companies	22 087
Cost related to process of establishing a strategic partnership and bond issue	22 700
Total	44 782

NOTE 20 – GROUP LOANS

The balance include a short term debt to the parent company Aider Group AS of TNOK 201 802. A loan of TNOK 333 is also given to Gripr AS.

NOTE 21 – USE OF ESTIMATES AND ASSUMPTIONS

Management has used estimates and assumptions that have affected assets, liabilities, income, costs and information on potential liabilities. This particularly applies to the assessment of intangible assets. Future events may cause the estimates to change. Estimates and the underlying assumptions are assessed on an ongoing basis. Changes in accounting estimates are accounted for in the period in which the changes occur. Estimates and assessments are continuously assessed based on experience and factors that are considered reasonable under given conditions. Important estimates and assumptions that there is a significant risk of significantly affecting the book values of assets and liabilities during the next financial year are specified below. Important and critical assessments in the application of the company's accounting principles are also specified.

Valuations of intangible assets

The most important estimates and assumptions for which there is a significant risk of significantly affecting the book values of assets and liabilities during the next financial year are related to the valuation of intangible assets. Intangible assets related to software, development and licenses, and are amortized over an expected life estimated at years. The assets that are subject to depreciation are assessed annually for possible impairment. Recoverable amounts for cash-generating units are determined based on valuation of fair value less sales costs or by estimation of value in use. For further discussion of assessments of intangible assets, see note 7.

NOTE 22 – FINANCIAL RISK, CLASSIFICATION OF FINANCIAL INSTRUMENTS AND MEASUREMENT OF FAIR VALUE

The group has limited exposure to financial risks. The most important financial risks the group is exposed to are related to credit risk and liquidity risk.

i) Credit risk

The group is mainly exposed to credit risk linked to trade receivables and other short-term receivables, as well as fluctuation in NIBOR-rates related to the interest on the obligation debt.

There is no significant credit risk linked to a single counterparty or several counterparties that can be perceived as a group due to similarities in credit risk.

ii) Liquidity risk

Liquidity risk is the risk that the group will not be able to service its financial obligations as they fall due. The group's strategy for managing liquidity risk is to always have sufficient liquid funds, so that financial obligations can be met when due, also in the event of extraordinary events, without risking unacceptable losses or the group's reputation. A group account arrangement has also been implemented to secure payments across the companies in the group.

Classification of financial instruments

Aider Group

The group's financial assets consist of receivables, obligation debt and bank deposits which are fully assessed at amortized cost. All the group's financial obligations are assessed at amortized cost.

Principles for calculating fair value

Financial instruments in the parent company and group accounts consist of cash, accounts receivable, long-term and short-term debt. All are assessed at face value, which represents fair value.

NOTES TO FINANCIAL STATEMENT

AIDER KONSERN AS

Accounting principles

The annual accounts have been prepared in conformity with the provisions of the Accounting Act and good accounting practice.

Use of estimates

In the preparation of the annual accounts estimates and assumptions have been made that have affected the profit and loss account and the valuation of assets and liabilities, and uncertain assets and liabilities on the balance sheet date in accordance with generally accepted accounting practice. Areas which to a large extent contain such subjective evaluations, a high degree of complexity, or areas where the assumptions and estimates are material for the annual accounts, are described in the notes.

Revenues

Income from the sale of goods is recognized on the date of delivery. Services are posted as income as they are delivered. Income from the sale of services and long-term manufacturing projects (construction contracts) are posted to the profit and loss account in line with the project's degree of completion, when the outcome of the transaction can be estimated in a reliable manner. When the transaction's outcome cannot be estimated reliably, only income corresponding to a projects' incurred costs can be posted as revenue. At the time when it is identified that the project will give a negative result, the estimated loss on the contract is posted in full to the profit and loss account.

Tax

The tax charge in the profit and loss account consists of tax payable for the period and the change in deferred tax. Deferred tax is calculated at the tax rate at 22 % on the basis of tax-reducing and tax-increasing temporary differences that exist between accounting and tax values, and the tax loss carried forward at the end of the accounting year. Tax-increasing and tax-reducing temporary differences that reverse or may reverse in the same period are set off and entered net. The net deferred tax receivable is entered on the balance sheet to the extent that it is likely that it can be utilized.

Classification and valuation of fixed assets

Fixed assets consist of assets intended for long-term ownership and use. Fixed assets are valued at acquisition cost less depreciation and write-downs. Long-term liabilities are entered on the balance sheet at the nominal amount at the time of the transaction. Plant and equipment is capitalized and appreciated over the economic lifetime of the asset. Significant items of plant and equipment that consist of several material components with different lifetimes are broken down in order to establish different depreciation periods for the different components. Direct maintenance of plant and equipment is expensed on an ongoing basis under operating costs, while additions or improvements are added to the asset's cost price and depreciated in line with the asset. Plant and equipment is written down to the recoverable amount in the event of a fall in value that is not expected to be temporary. The recoverable amount is the higher of the net sales value and the value in use. Value in use is the present value of future cash flows related to the asset. The write-down is reversed when the basis for the write-down is no longer present.

Research and development

Expenses on research and development are capitalized to the extent one cannot identify a future economic benefit related to the development of an identifiable intangible asset and where the acquisition cost can be measured reliably. In the opposite case such costs are expensed as incurred. Capitalized research and development is depreciated on a straight line basis over its economic lifetime.

Subsidiaries and associated companies

Subsidiaries and associated companies are valued using the cost method in the company accounts. The investment is valued at acquisition cost for the shares unless a write-down has been necessary.

A write-down to fair value is made when a fall in value is due to reasons that cannot be expected to be temporary and such write-down must be considered as necessary in accordance with good accounting practice. Write-downs are reversed when the basis for the write-down is no longer present.

Dividends, group contributions and other distributions from subsidiaries are posted to income in the same year as provided for in the distributor's accounts. To the extent that dividends/group contributions exceed the share of profits earned after the date of acquisition, the excess amounts represents a repayment of invested capital, and distributions are deducted from the investment's value in the balance sheet of the parent company.

Goods

Goods are valued at the lower of acquisition cost and net sale value. Sale value is the estimated sale price in ordinary operations after deduction of estimated necessary expenses for completing the sale. Acquisition cost includes expenses incurred in acquiring goods and costs necessary to bring the goods to the present position and are attributed using the FIFO principle.

Receivables

Receivables from customers and other receivables are entered at par value after deducting a provision for expected losses. The provision for losses is made on the basis of an individual assessment of the respective receivables. In addition an unspecified provision is made to cover expected losses on claims in respect of customer receivables.

Cash flow statement

The cash flow statement has been prepared using the indirect method. Cash and cash equivalents consist of cash, bank deposits and other short-term, liquid investments

NOTE 1 – TRANSACTION WITH RELATED PARTIES

Related party	Affiliate
Aider AS	Subsidiary
Aider Sørøst AS	Subsidiary

The following internal transaction have found place in 2024:	Amount
Sale of group services	9 488

Adminflow AS	Sandakerveien 138, 0484 Oslo	5 850	25 %	25 %	24 468	-3 364

*The companies financial accounts for 2024 is not finalized.and figures are for 2023.

NOTE 7 – BANK DEPOSITS

The company has no restricted cash.
The company is the holder of the group cash pool.

NOTE 8 – SHARE CAPITAL, SHAREHOLDER INFORMATION

Share capital	Number outstanding	Face Value	Carrying value
Ordinary shares	1 000 000	2	2 000 000
Total	1 000 000		2 000 000

The share capital is owned by the following shareholders:

Shareholders:	Number of shares	Ownership
Aider Group AS	1 000 000	100%
Total number of shares	1 000 000	100%

NOTE 9 – PAWNED ASSETS AND GUARANTEES

Nordic Trustee AS had at the end of 2024 lien of MNOK 12 750 on the shares, factoring, as well as lien in the receivables in the subsidiaries

(Amount in NOK 1000)	2024	2023
Debt secured by pawn and guarantees		
Obligation loan	1 564 901	858 451
Loan from credit institutions	-	34 999
Total	1 564 901	893 450
Book value of pawned assets		
Investment in subsidiaries	1 641 204	737 997
Total	1 641 204	737 997

NOTE 10 – LONG-TERM INTEREST BEARING DEBT

Long-term debt with maturity over five years after reporting date:

(Amount in NOK 1000)	Currency	Maturity	Maturity ≤ five years
Bond	NOK	05.09.2028	1 564 901

Bond terms:
Aider Konsern AS have issued a bond of MNOK 1 600. the bond have an interest of 4.15% + nibor and principal shall be paid in full on the maturity date.

Bond covenant – free liquidity
In relation with the bond, the Group must have the higher of MNOK 50 or 5% of the aggregate outstanding nominal bond amount in free liquidity at any time in. Aider complies with this covenant requirement:

Item	31.12.24
Cash and cash equivalents	237 501
Money Market fund	256 002
Restricted cash related to payroll and acquisitions	-47 225
Overdraft facility	40 000
Free liquidity	486 279
Covenant requirement highest of MNOK50 or 5%	80 000
Over-/under coverage	406 279

Net interest bearing debt to EBITDA:

Debt Leverage	31.12.24
Interest bearing debt	1 565 753
Total interest bearing liabilities	1 565 753
Cash and cash equivalents	493 503
Net interest bearing debt	1 072 250
 EBITDA LTM*	 229 770
Net interest bearing debt to EBITDA	4.7

In ordrer for Aider Konsern to tap on the bond according to the term sheet, the covenant must be below 4.5.

**ebitda ltm is proforma ebitda last twelve months included allowed one-off adjustments (special items) and synergies under terms of agreement for the bond.*

The special items that are adjusted are the following in 2024:

Item	31.12.24
Integration of new offices and aquired companies	22 087
Cost related to process of establishing a strategic partnership and bond issue	22 700
Total	44 782

RESPONSABILITY STATEMENT

RESPONSABILITY STATEMENT

We confirm, to the best of our knowledge, that the financial statements for the period 1 January to 31 December 2024 have been prepared in accordance with current applicable accounting standards, and give a true and fair view of the assets, liabilities, financial position and profit or loss of the entity and the Company taken as a whole.

We also confirm to the best of our knowledge that the Board of Directors report includes a true and fair review of the development and performance of the business and the position of the entity and the Company, together with a description of the principal risks and uncertainties facing the entity and the Company.

OSLO, 30.04.2024

GENERAL INFORMATION

Aider Konsern AS is a holding company for companies that provide accounting, advisory services and related IT-services. The company's address is Karl Johans gate 37, 0162 Oslo.

The company mainly invests in other companies that provide accounting, advisory and technology services to customers who outsource all or part of their finance function.

Introduction

This report marks the first sustainability report audited according to the requirements of EU's Corporate Sustainability Reporting Directive (CSRD) for Aider Konsern AS (hereafter referred to as Aider). This report covers Aider for the 2024 financial year and follows the same consolidation scope as our financial reporting. Any deviations from this scope are specifically noted.

Through a double materiality assessment, we have identified three key sustainability topics that are most relevant to our business: E1 – Climate Change, S1 – Own Employees, and G1 – Business Conduct. These areas shape our sustainability strategy and have led to concrete actions within procurement, business travel, and policies.

Aider's role in a sustainable future

Aider is a Norwegian accounting and advisory firm that helps businesses of all sizes—from startups to listed companies—navigate financial and operational challenges. As of December 31, 2024, we had 1271 employees and a revenue of NOK 1 339 million.

As regulations and expectations around sustainability evolve, we see it as our responsibility to support businesses in understanding and adapting to these changes. Many of our clients already face sustainability-related demands from investors, banks, and business partners, and we want to ensure they are well-equipped to respond. At the same time, the accounting profession itself is changing, with sustainability reporting becoming an integral part of financial disclosures. Aider is committed to guiding our clients through this transition by integrating sustainability considerations into our core services.

To reinforce this commitment, we have taken our industry association, Regnskap Norge's sustainability pledge. This means we are actively engaging in sustainability discussions with our clients to help them identify risks and opportunities. We support them in setting clear and realistic sustainability goals and assist in implementing the necessary measures to meet these targets. Beyond advising our clients, we also recognize the importance of leading by example. Strengthening our own sustainability efforts is a priority, and we are continuously building internal expertise, setting measurable goals, and reporting in line with recognized frameworks.

Our contribution to the UN Sustainable Development goals

The UN Sustainable Development Goals (SDGs) provide a shared roadmap for tackling global challenges, and Aider is committed to playing a role in this effort. We focus particularly on:

- **Goal 4 – Quality Education:** We invest in developing future financial professionals by recruiting and training recent graduates, creating opportunities for learning and career development.
- **Goal 8 – Decent Work and Economic Growth:** We promote responsible business practices, both within our own operations and by supporting our clients in their transition to more sustainable business models.
- **Goal 12 – Responsible Consumption and Production:** We help businesses improve their sustainability reporting, enabling greater transparency and accountability across industries.
- **Goal 17 – Partnerships for the Goals:** We believe collaboration is key to driving change, which is why we actively participate in sustainability initiatives such as Regnskap Norge's sustainability forum, UN Global Compact, and dialogue with local businesses.

ESRS 2: CROSS-CUTTING STANDARDS

BP-1 General basis for preparation of the sustainability statement

Aider's Sustainability Report has been prepared on a consolidated basis and follows the same scope of consolidation as our financial reports. No subsidiaries are exempt from individual or consolidated sustainability reporting unless specifically noted. Our materiality assessment covers both the upstream and downstream value chain, where we map impacts, risks and opportunities (IROs). Our policies, measures and objectives also include the value chain and the reporting on relevant key figures reflects this.

Options to omit information related to intellectual property rights, know-how or innovation have not been exercised, nor have we exercised the option to omit information about imminent developments or ongoing negotiations.

BP-2 Disclosures in relation to specific circumstances

Aider uses time horizons in line with the definitions in ESRS 1 and has found no reason to deviate from these. In our E1-6 disclosures, we have included sector-based spend estimates for Scope 3 emissions, based on Morescope's Environmental Economic Model, which has been developed by SINTEF. This model uses financial transaction data to generate detailed estimates of consumption-based emissions.

Some GHG metrics have a high degree of uncertainty, especially related to spend-based calculations, as these depend on general emission factors, indirect estimates from monetary values, price variations and assumptions that do not necessarily reflect specific emission sources. To improve accuracy, we plan to enrich Scope 3 categories with activity data.

This years sustainability reporting will undergo external auditing. Necessary references to standards and frameworks are included and available to the auditor. Aider also reports in accordance with the Norwegian law, for example The Transparency Act (Åpenhetsloven) and the Equality and Anti-Discrimination Act.

GOV-1 The role of the administrative, management and supervisory bodies

Aider Konsern AS's Board of Directors consists of two men and one woman, see the annual report for more details. The board of Aider Holding AS, on the other hand, comprises three executive and four non-executive members, including two employee-elected representatives.

For this CSRD report, we have chosen to elaborate on the board of Aider Holding AS, as it is the governing body responsible for overseeing sustainability at Aider. While Aider Konsern AS is referenced throughout the report, there is a direct governance line from Aider Holding AS to Aider Konsern AS, ensuring alignment in decision-making and sustainability oversight. As a result, there are no material differences between the two in the context of this reporting.

The Aider Holding AS board (hereafter referred to as the board) brings extensive experience in accounting, consulting, and sustainability advisory across various sectors and geographical regions. The gender distribution is 43% women and 57% men, with 29% independent members.

Both the board and Executive Management Team possess extensive expertise in sustainability, with the company's sustainability advisors providing support for complex assessments. The management team has a strong background in governance, ensuring that IROs are well managed. For social (S1) matters, our in-house HR team has the necessary knowledge to address IROs. Environmental (E1) aspects are overseen by Aider's sustainability experts and supported by specialized software, ensuring effective management of IROs.

The Board of Directors holds overall responsibility for strategic decision-making. The Executive Management Team is responsible for implementing strategies and operational decisions. As a result of getting Castik Capital as majority shareholder, Aider will be updating how its administrative bodies and executive management oversees targets and progress related to its material impacts, risks and opportunities.

As of now the management of sustainability work is structured in three main areas:

Environmental			Social			Governance		
Theme	Sponsor	Owner	Theme	Sponsor	Owner	Theme	Sponsor	Owner
Climate Change	CFO	ESG	Work Environment	HR	HR	Business Conduct	CFO	CFO
			Diversity and Inclusion	HR	HR	Compliance	Manager Quality	Quality
			Human-Rights	CFO	ESG			

GOV-2 INFORMATION PROVIDED TO, AND SUSTAINABILITY MATTERS ADDRESSED BY THE ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES

The Board of Directors and the executive management team are informed annually of significant sustainability issues, including impacts, risks and opportunities.

Until now, sustainability reporting has been an annual exercise, but Aider is working to structure the follow-up better in collaboration with its new owner in 2025, Castik .

Currently, the board's involvement is mainly limited to an annual strategy meeting, but there is a recognized need to integrate sustainability into the ordinary risk management and decision-making processes.

GOV-3 Integration of sustainability-related performance in incentive schemes

At present, sustainability-related goals are not directly linked to incentive schemes or bonus structures for the board or executive management.

GOV-4 Statement on due diligence

Aider's due diligence process is built on data-driven analysis and risk assessments to ensure responsible business practices. Our climate reporting includes a full carbon account, while our human rights efforts are guided by the Norwegian Transparency Act. Our ongoing work with the Transparency Act has been instrumental in refining our due diligence approach. We have completed a comprehensive risk assessment of our supply chain, prioritizing targeted follow-ups on key suppliers via Factlines. This enables us to identify risks and implement effective measures to mitigate them.

Our due diligence process follows six key steps based on the OECD model:

- 1. Establish accountability through policies and governance systems.
- 2. Identify and assess potential negative impacts.
- 3. Stop, prevent, or mitigate adverse impacts.
- 4. Monitor implementation and results.
- 5. Communicate how impacts are managed.
- 6. Provide or collaborate on remediation and compensation where necessary

By adhering to these principles, we strengthen our commitment to responsible business practices and sustainable operations. The 2024 due diligence statement will be published on aider.no before June 30, 2025

See Table 2 in the appendix for topics identified through our due diligence and materiality assessment.

We conduct detailed due diligence assessments, particularly in key supplier categories such as IT equipment, cleaning services, and catering at our largest offices. Following SASB industry standards and The Norwegian Government Agency for Financial Management (DFØ)'s high-risk list, we recognize IT equipment as a high-risk category due to potential human rights concerns in production. To promote responsible procurement, we require suppliers to adhere to international standards and participate in sustainable industry initiatives. Supplier surveys help us gather current information on our suppliers' social and environmental performance. These surveys cover corporate responsibility, supply chain oversight, human rights, and anti-corruption. The insights enable us to identify risks, ensure compliance with OECD and UN Global Compact guidelines, and collaborate with suppliers to prevent and mitigate negative impacts.

For social matters (S1), we utilize insights from our internal employee survey to address workforce concerns. We also engage with both internal and external stakeholders, including employees, management, and Regnskap Norge. This collaboration ensures we focus on the most pressing issues affecting our business and stakeholders.

Our procurement policy outlines expectations for supply-side contractual partners, emphasizing both social and environmental sustainability.

GOV-5 Risk management and internal controls over sustainability reporting

At Aider, we recognize that environmental, social, and governance factors can pose potential risks to our business. We are committed to proactively managing these risks to ensure long-term sustainability and value creation for our clients and stakeholders.

To achieve this, we conduct a comprehensive ESG risk assessment that identifies sustainability-related risks. See chapter Double materiality assessment - IRO-1 and IRO-2 below for more information about our materiality assessment. The risk analysis and its findings were presented to the Board, and its recommendations now serve as the foundation for our ongoing sustainability work. Periodic updates on the implementation of proposed actions and improvements will be reported to the Board to ensure continuous oversight and alignment with strategic objectives. Our ESG measures are as follows:

SBM-1 Strategy, business model and value chain

At Aider, our goal is to be a trusted partner for clients facing sustainability challenges in areas such as recruitment, financing, and sales.

Our business is built on three core areas—Accounting, Advisory, and Tech—delivering efficient, data-driven, and forward-thinking solutions. In addition, we are developing dedicated sustainability advisory services to help clients identify risks, set prioritized goals, and achieve measurable outcomes. Internally, we reinforce our sustainability efforts by building expertise, setting clear goals, and reporting our progress in line with recognized standards.

Aider's value chain is strengthened by strategic partnerships with leading technology providers, ICT suppliers, software providers, and facility service companies.

SBM-2 Interests and views of stakeholders

We engaged with stakeholders through various methods, including meetings, calls, surveys, and emails. Internal stakeholders included regional managers, the Working Environment Committee (AMU), and employees via the employee survey. External stakeholders comprised the industry association Regnskap Norge and key suppliers.

Our engagement focused on material topics S1, S2, G1, and S4. Internally, we used structured feedback mechanisms such as AMU discussions and employee surveys. Externally, we held dialogues with the industry association and major suppliers. This engagement aimed to capture stakeholder perspectives on the company's impacts, opportunities, and risks, ensuring a well-founded materiality assessment.

Stakeholder input influenced the materiality assessment, leading to an adjustment in scoring for S4 based on feedback from Regnskap Norge. Insights from stakeholders were also integrated into action and implementation plans. The company analyzed stakeholder interests during the materiality assessment, particularly regarding sustainability topics such as S1, S2, G1, and S4.

No amendments to the strategy and business model were made based on stakeholder engagement. However, the materiality assessment process led to the refinement of topic evaluations, particularly the reassessment of S4 in response to Regnskap Norge's input. Future actions include integrating stakeholder feedback into sustainability strategies and operational plans, enhancing alignment with stakeholder expectations and industry standards.

With Castik's acquisition of Aider, stakeholder engagement will be expanded further in the next reporting period, although Castik has been consulted as a stakeholder for this reporting period as well. Future steps are unlikely to modify dialogue with current stakeholders, but more stakeholders are likely to be identified as Aider continues to grow.

Administrative, management, and supervisory bodies are informed through the preparation of the sustainability statement.

SBM-3 Material impacts, risks and opportunities and their interaction with strategy and business model

Aider's materiality assessment highlights key sustainability factors that influence our operations, financial stability, and strategic direction. Climate change mitigation is a significant consideration, as our business activities, including IT usage, office materials, and business travel, contribute to our environmental footprint. While these are essential for operations, we continuously explore ways to reduce emissions and improve energy efficiency to align with regulatory expectations and long-term sustainability goals.

As a major employer, workforce conditions and employee well-being remain central to our business. Fair salaries, professional development, and compliance with labor laws ensure employee engagement and productivity. However, challenges such as commuting emissions and overtime requirements need ongoing attention, and we actively work to maintain work-life balance and operational flexibility, at the same time as we continue giving possibilities for career development and interesting work.

Maintaining a strong corporate culture requires transparency and accountability. Aider has established a whistleblower procedure that allows employees to report concerns safely, reinforcing ethical business conduct and mitigating reputational risks. Clear policies on corruption, bribery, and compliance ensure alignment with both internal standards and regulatory requirements. Additionally, supplier management is an integral part of our operations, as we rely on a diverse range of vendors, including IT providers, software suppliers, and facility service companies. Responsible procurement practices are essential to mitigating supply chain risks, particularly as sustainability regulations evolve.

Aider does not engage in lobbying, but we closely monitor regulatory developments through industry associations such as Regnskap Norge. This involvement ensures we remain ahead of policy changes that may impact both our operations and those of our clients. Financially, the rising costs of goods and services, IT infrastructure, and office supplies pose risks, as do energy consumption, employee overtime, and waste management. However, these are counterbalanced by opportunities arising from strong salary structures, sustainability advisory services, and adherence to OECD due diligence standards, which enhance our market position and long-term resilience.

By embedding these material topics into our business strategy, Aider ensures that risks are managed effectively while sustainability-driven opportunities continue to strengthen our company's ability to create value for employees, clients, and stakeholders.

Double materiality assessment - IRO-1 and IRO-2

Introduction

Aider's double materiality assessment (hereafter referred to as our DMA) is a comprehensive process designed to understand both the company's impact on society and the environment, and the financial risks and opportunities arising from these impacts. Our DMA covers all aspects of our operations, including direct activities and our upstream and downstream value chain. This work forms the foundation for what impacts, risks and opportunities Aider will address in the future. Our DMA process is fully integrated into our overall risk management framework. This means we continuously monitor financial risks and opportunities, such as climate transition risks and regulatory changes, to keep our business strategy agile and resilient.

Identification of material impacts

To identify, assess, prioritize, and monitor potential and actual impacts, risks, and opportunities (IRO) on people and the environment, we structured our analysis around key sustainability themes such as E1 (Climate Change) and S1 (Own Workforce). These themes were then further divided into sub-themes and sub-sub-themes for a more detailed assessment. Each element was linked to the specific part of the company responsible for that activity, which we refer to as the activity center. Next, we examined the underlying drivers for each activity to understand what factors are influencing them. Finally, we assessed the resulting impacts, determining whether they were negative or positive. For instance, under the theme E1 – Climate Change, in the sub-theme "Climate Change Adaptation" and the sub-sub-theme "Scope 2.1 Purchased Electricity," the activity center was identified as the entire company. Here, the driver is electricity usage, which leads to carbon emissions which we classify as a negative impact.

Once we had mapped out these themes, we scored each activity on its impact materiality and financial materiality. For impact materiality, we evaluated the probability of the impact, its scope, scale, and the extent to which it is irremediable, using a scale from 1 to 5. If an activity achieved a combined score of 9 or higher, it was considered material. For financial materiality, we examined the financial implications of each impact—both negative and positive—often linked to laws, regulations, customer relations, or employee relations. We scored the risks and opportunities based on their probability and magnitude, then we multiplied these scores to obtain an overall financial score.

This process allowed us to identify our material topics. For example, in the E1 – Climate Change theme, the sub-theme "Climate Change Mitigation" was deemed material in terms of its impact, though not financially material. In the S1 – Own Workforce theme, "Working Conditions" was considered material for both impact and financial materiality, while "Other Work-Related Rights" was material only in terms of impact. In the G1 – Business Conduct theme, "Corporate Culture" was material for both impact and financial materiality, whereas "Management of Suppliers," "Political Engagement and Lobbying," and "Corruption and Bribery" were found to be material based on impact alone.

Accompanying this, we analyzed our largest negative and positive impacts, as well as those with the highest financial materiality. For example, some of our biggest negative impacts include employee commuting and company-mandated overtime, while our biggest positive impacts include services that help provide critical market information and good payment routines. In terms of financial materiality, activities such as the purchase of goods and services and employee commuting emerged as significant, and our dependency on factors like our own workers was particularly notable. The results of this assessment are summarized in our tables, included in the appendix, which lists the material topics along with their impact and financial materiality classifications, and rank our biggest negative and positive impacts along with the most financially material impacts and dependencies.

Stakeholder engagement

Our DMA relies on active stakeholder engagement to ensure our evaluation of sustainability impacts is comprehensive. To assess climate impacts (E1), we performed a complete carbon footprint analysis using Morescope's software, supported by input from our internal sustainability team. Furthermore, we gathered feedback through internal surveys, discussions with HR, and regional manager input to understand how work-life balance and overtime affect our employees (S1). In assessing business conduct (G1), we worked with our quality management and finance teams and added external insights from Regnskap Norge. This combined approach helps us capture both the potential and actual impacts across our business.

ENVIRONMENTAL INFORMATION

E1: Climate change

E1.SBM-3 Material impacts, risks and opportunities and their interaction with strategy and business model

In our 2024 DMA, we evaluated the impacts of climate change and assessed risks and opportunities through our climate resilience analysis. Our review indicates that our business model, current assets, and locations are exposed to a low level of climate-related risks, and we assess our overall resilience to be high. The table below provides an overview of the identified climate-related risks, both transitional and physical.

Our climate resilience analysis identified several transitional risks, including four high-level ones. The first relates to Castik Capital's ownership involvement, which increases requirements for financial and sustainability reporting. The remaining three high-level transitional risks pertain to the potential challenge of meeting future client requirements if their climate ambitions and expectations surpass our own performance. While we do not anticipate this risk materializing in the short term, we recognize the growing demand for climate action. We have not identified any physical risks associated with our business model, locations, or activities, which supports our high level of resilience.

From our DMA, we identified employee commuting and the purchase of goods and services as the biggest negative impacts related to climate change. The biggest positive impacts are that our services help provide information to the markets and maintain good payment routines. The most financially material impacts are the purchase of goods and services, company-mandated overtime, and good salary routines.

E1-1: Significant influences, risks and opportunities related to climate change

We have conducted a targeted and data-driven analysis of our impact on climate change. For section E1, we completed a carbon account using the Morescope system, which served as the foundation for our impact assessments. We identified and screened climate-related physical risks in our operations and value chain, as shown in Table 3 Energy use mix in the appendix. These assessments were based on previous analyses and were re-evaluated for 2024, as our core operations remain unchanged.

In assessing climate-related transitional and physical risks, we considered both short and long-term horizons. As discussed in the DMA section, we face limited physical risks, while some transitional risks require further scenario analysis to understand their full impact. Our screening process focused on short and long-term horizons, which we believe are more fitting for our operations and strategy moving forward.

The DMA section includes an extensive review of operations that might be exposed or sensitive to climate-related hazards. For more detailed information, see Double materiality assessment - IRO-1 and IRO-2 above. Climate-related transitional risks and opportunities were screened and assessed through a self-evaluation. The table below illustrates the different parameters and their significance in both the short and long term.

Physical Risk	Short term perspective	Long term perspective
Increased severity of extreme weather conditions such as cyclones and floods	Low	Low
Rising average temperatures	Low	Low
Rising sea levels	Low	Low
Transitional risk	Short term perspective	Long term perspective
Increased pricing of greenhouse gas emissions	Low	Low
Preparing for emissions reporting obligations	Medium	Low
Mandate and regulation of existing products and services	Medium	High
Replacement of existing products and services with lower-emission alternatives	Low	Low
Costs for transitioning to low-emission technology	Low	Low
Changes in customer behavior	Medium	High
Uncertainty in market signals	Low	Low
Increased raw material costs	Low	Low
Changes in consumer preferences	Medium	High
Stigmatization of the sector	Low	Low
Increased concern from stakeholders or negative feedback from stakeholders	Medium	High

Transition events were identified over short and long-term horizons. In the climate risk and opportunities table, possible transition events were screened, with short-term risks assessed as low to medium and some long-term events identified as potentially higher risk. Combining the DMA analysis with the identification of climate-related risks and opportunities, we concluded that our assets and business activities have a medium exposure and sensitivity risk connected to transition events. For a full overview of screened activities, see table 2 in the appendix. The corporation has not conducted any scenario analysis based on the identified transition events, and the assessment of exposure has not been completed.

E1-2: Guidelines for climate change mitigation and adaptation

Aider has integrated climate change into our ESG policy, where we have committed to annual carbon accounting in line with the GHG Protocol and relevant standards. Our climate targets will follow the principles of the Science Based Targets initiative (SBTi), and we are working to reduce our carbon footprint in line with the Paris Agreement.

E1-3: Measures and resources for implementing climate policy

To develop an effective decarbonization strategy, we have established a strong foundation by integrating climate change mitigation into our governance parameters. In 2024, we focused on implementing our ESG policy, detailed in E1-2, and concentrated on mitigating climate change through business travel, procurement, and waste management. For a complete list of measures, see the table of completed measures in the appendix and the planned measures in our governance chapter.

Our current climate action management resources come from the sustainability team within our advisory services. We assessed the efforts required to manage these actions in 2024 as moderate. To accelerate progress and align with our growth strategy for 2025, we will dedicate a resource on 30 % position to internal sustainability issues. This individual will collaborate closely with our sustainability team and seek their support when necessary.

E1-4: Objectives related to climate change mitigation and adaptation

At this stage, we have not identified any material targets for disclosure, as our primary focus has been on establishing a solid foundation through policies and obtaining high-quality environmental data. As our policies and data quality improve, we will shift our focus toward setting targets to manage material climate-related impacts, risks, and opportunities. Continued data collection will provide a strong foundation to measure and track progress against targets and initiatives over time, ensuring informed decisions and meaningful change.

As we aim to set GHG emissions targets in the coming years, we recognize that, given our significant growth and future expansion plans, it is more meaningful to track GHG emissions intensity rather than focusing solely on total emissions. Emissions intensity, defined as total emissions divided by either the number of employees or our revenue, provides a clearer picture of our emissions relative to our growth. This approach will help us better align our environmental performance with our evolving business operations.

E1-5: Energy use and energy mix

Our energy use is mainly based on renewable sources, with 95% of energy consumption coming from renewable electricity. Fossil energy accounts for a minimal share (3%), while nuclear energy accounts for 2%. We will continue to improve our energy use by evaluating efficiency opportunities and working with our landlords for more climate-friendly office solutions.

For full table of energy use and mix, see table 3 in the appendix.

E1-6: Greenhouse gas emissions (Scope 1, 2 and 3)

Aider has no direct emissions (Scope 1), while our Scope 2 emissions from purchased electricity have increased by 69% from 2023 to 2024, mainly due to business growth and new office space. Scope 3 emissions have increased by 35%, primarily driven by the purchase of goods and services (+23%) and employee commuting (+74%).

Our inventory includes the categories in the table below. We have excluded several Scope 3 GHG emissions categories from our inventory due to their negligible size. Additionally, the category of franchises is not relevant to our organization as we do not have any franchises.

Scope	Base year emissions (2023)	Current year emissions
Scope 1	None	None
Scope 2 (Location based)	8.94 tCO2e	15.34 tCO2e
Scope 2 (Market based)	8.94 tCO2e	15.34 tCO2e
2.1 Purchased electricity	8.94 tCO2e	15.34 tCO2e
Scope 3	2396.41 tCO2e	3225.87 tCO2e
3.1 Purchased goods	1910.18 tCO2e	2355.47 tCO2e
3.3 Fuel and energy related emissions	0.85 tCO2e	1.46 tCO2e
3.4 Upstream and downstream transportation	20.60 tCO2e	11.19 tCO2e
3.5 Waste generated in operations	10.74 tCO2e	17.16 tCO2e
3.6 Business travel	103.32 tCO2e	225.83 tCO2e
3.7 Employee commuting	339.59 tCO2e	592.48 tCO2e
3.8 Upstream leased assets	11.13 tCO2e	22.29 tCO2e

Emissions are calculated according to Morescope's Environmental Economic Model (MEEM). MEEM is a leading Environmentally Extended Multi-Regional Input-Output model that converts financial transactions into detailed spend-based emission estimates, accounting for sector-specific emission intensities, global trade relations, and production technologies. This ensures a data-driven and reliable approach to emissions analysis.

We have calculated our GHG emissions intensity on both a location-based and market-based approach, resulting in an intensity of 2,408 tons per MNOK of net revenue.

The GHG intensity based on net revenue is calculated by dividing total gross Scope 1, Scope 2, and Scope 3 emissions by our reported net revenue, which is 1 339,606 MNOK. This figure aligns with the net revenue reported in our financial statement on page 8.

The EU TAXONOMY

EU Taxonomy Background and scope

The EU taxonomy is a classification system designed to define which economic activities can be considered environmentally sustainable.

The EU taxonomy framework (EU taxonomy Regulation 2020/852) primary goal is to redirect investments towards sustainable projects. Contributing to the achievement of the European Union's 2030 climate and environmental goals and advancing the objectives outlined in the European Green Deal. Our assessment below is in compliance with the regulation EU 2020/852 and the associated amendments to the annexes of the Disclosure Delegated Act, introduced on the 27th of June 2023.

The Taxonomy Regulation establishes four key conditions for an economic activity to be considered environmentally sustainable. First, it must make a substantial contribution to at least one environmental objective. Second, it must not cause significant harm to any of the other five environmental objectives. Third, it must comply with minimum safeguards, ensuring adherence to social and governance standards. Finally, it must meet the technical screening criteria set out in the Taxonomy Delegated Acts.

Technical screening procedures

Aider has implemented the assessment of technical screening criteria for the environmental objectives; 1. Climate Change Mitigation, 2. Climate Change Adaptation, 3. Water and Marine Resources, 4. Circular Economy, 5. Pollution Prevention and Control, and 6. Biodiversity and Ecosystems according to the EU Taxonomy.

An economic activity contributes substantially to the environmental objective climate change mitigation where that activity complies with the technical criteria for substantial contribution to the stabilization of greenhouse gas concentrations in the atmosphere at a level consistent with the Paris Agreement.

In carrying out the process we have used specially adapted software from one of our partners.

Eligible and aligned economic activities

Aider has established that economic activities qualify as eligible if they can be assessed against the technical screening criteria set out in the Climate Delegated Act and the Environmental Delegated Act, and if they have the potential to be or become taxonomy aligned. We have identified the following economic activity as eligible for EU taxonomy reporting for the fiscal year 2024:

CCM 8.2 Data-driven solutions for GHG emissions reductions

This activity refers to two of Aiders operations. The first operation is within the sustainability team under the advisory department. As a system provider, we enable customers to gain a comprehensive understanding of their climate footprint through Morescope.

The second operation under this category is with our subsidiary company Grasp Labs As. Grasp Labs is a company who collect, analyzes and organizes data from open web resources, and make the data available for Aiders customers.

Evaluated activities which were not evaluated as eligible

Several activities were initially evaluated as eligible. However, after a thorough review of Aider's operations and services, they were ultimately classified as not eligible

Aider operates within activity 8.2 Computer programming, consultancy, and related services. Our extensive tech department specializes in system solutions, support, consulting, and ERP system development. This activity falls under the classification of Climate Change Adaptation (CCA). To qualify under CCA, climate risk and vulnerability assessment must be conducted, along with the establishment of an expenditure plan. As these requirements have not been met for the fiscal year 2024, this activity does not qualify under the EU Taxonomy.

While Aider offers courses and certifications in Economics, this does not fall under Activity 11 (Education), as that category is specifically intended for schools. Similarly, Activity 8.1 (Data processing, hosting, and related activities) was considered but deemed inapplicable, as these services are provided through third parties. Activity 4.1 (Provision of IT/OT data-driven solutions) was also considered. However, Activity CCA 8.2 was deemed a more accurate classification, as Activity 4.1 did not fully align with the company's core business related to IT and software.

Determining whether eligible activities are aligned with the taxonomy criteria

We have evaluated the activities based on the four conditions outlined in the delegated acts. And for the fiscal year 2024, Aider does not have any activities classified as taxonomy aligned.

KPIs

The turnover KPI is calculated as Taxonomy-eligible turnover divided by total turnover (Note 3 in the consolidated financial statement). Similarly, the CapEx KPI is determined by dividing Taxonomy-eligible CapEx by total CapEx (Notes 5, 6, 7, 13 & 15 in the consolidated financial statement). The OpEx KPI is measured as Taxonomy-eligible OpEx divided by total OpEx, in accordance with the EU Taxonomy legislation. Further details on these KPIs are provided below.

Revenue is defined as Aider's total income from customer contracts, along with other sources of income, based on our consolidated revenue for the fiscal year 2024. CapEx includes additions to tangible and intangible assets during the financial year, accounting for acquisitions while excluding depreciation and amortization. The OpEx KPI aligns with the EU Taxonomy under Article 8 Delegated Act, Annex I, section 1.1.3.2, covering expenditures related to day-to-day servicing towards research and development, building renovations, short-term leasing, and repair and maintenance.

During the calculations of the financial KPIs, we have taken measures to avoid double counting. The eligible activities share similar accounts, and dummy variables were used in order to split the numbers into the correct activity.

To ensure the accuracy of our financial KPI calculations and prevent double counting, we implemented specific measures. Given that the eligible activities share similar accounts, we utilized dummy variables to systematically allocate figures to the correct activity. This approach allowed us to maintain data integrity, ensuring that financial metrics accurately reflect the performance of each activity without overlap or misrepresentation.

Minimum Safeguards

The minimum safeguards are built on four essential pillars: human rights, taxation, corruption, and fair competition. These pillars underscore the EU's dedication to promoting responsible and sustainable economic practices.

Aider, and its subsidiaries, is committed to conducting business in a responsible and upright manner and to respect human rights through our activities, in line with the Aider's Values.

We endorse the principles of the UN Guiding Principles on Business and Human Rights (UNGPs). We implement our commitment to these via our Code of Conduct, and other internal policies and procedures.

Nuclear and fossil gas related activities

Row	Nuclear energy-related activities	Yes/No
1	The undertaking carries out, funds or has exposures to research, development, demonstration and deployment of innovative electricity generation facilities that produce energy from nuclear processes with minimal waste from the fuel cycle.	No
2	The undertaking carries out, funds or has exposures to construction and safe operation of new nuclear installations to produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production, as well as their safety upgrades, using best available technologies.	No
3	The undertaking carries out, funds or has exposures to safe operation of existing nuclear installations that produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production from nuclear energy, as well as their safety upgrades	No
Fossil gas related activities		
4	The undertaking carries out, funds or has exposures to construction or operation of electricity generation facilities that produce electricity using fossil gaseous fuels.	No
5	The undertaking carries out, funds or has exposures to construction, refurbishment, and operation of combined heat/cool and power generation facilities using fossil gaseous fuels.	No
6	The undertaking carries out, funds or has exposures to construction, refurbishment and operation of heat generation facilities that produce heat/cool using fossil gaseous fuels.	No

SOCIAL INFORMATION

S1: Own Workforce

S1-1: Policies related to own workforce

Aider operates in accordance with the Norwegian Working Environment Act, the Equality and Anti-Discrimination Act, and the Holiday Act, which form the foundation of our workforce guidelines. These laws, along with our Employee Handbook and Health, Safety and Environment Handbook (HSE Handbook), guide our approach to occupational health and safety, diversity, and inclusion.

We have established ethical guidelines emphasizing equality and non-discrimination, supported by whistleblowing routines to ensure a fair and safe working environment. Our core value, "People First" is about our belief that, ultimately, our industry is more about people than numbers. It also emphasizes that people's unique perspectives are important to us as an organization. At the same time, we know that diversity does not create value by itself and can even be a source of complexity. However, diversity done right will generate new ideas, better business solutions, and a more vibrant workplace. We care deeply about providing equal opportunities for all, and leveraging different strengths, competencies and perspectives to create value, and to put People First.

We have a Working Environment Committee (WEC) and employee representatives as board members. Our Employee Handbook outlines our culture and guiding principles, reflecting our value-driven approach. Coordinated promotion processes and salary adjustment processes with national-level calibration are well established.

In line with our "People First" value, we mark Pride and religious celebrations. Our largest offices are wheelchair accessible and have rooms to pray or relax. Some offices collaborate with Nav to offer work and language training. Our onboarding process includes reading this and other policies. We have established whistleblowing routines and a whistleblowing channel open to all employees.

We seek to ensure that we build an organization of people than can challenge status quo and deliver premium customer experience through the recruitment process. Our statutory statement on equality and anti-discrimination provides more details on how we work with equality, diversity, and inclusion.

S1-2: Processes for engaging with own workforce and workers' representatives about impacts

Our employee engagement survey and formal employee-manager conversations, conducted semi-annually, provide platforms for all employees to offer input and feedback on workplace conditions.

The employee-manager conversations are crucial for development, motivation, and sharing thoughts and feedback. They cover well-being, work tasks, goal setting, development, and other relevant topics. We also encourage more frequent one-on-one conversations between managers and employees.

The employee engagement survey, which is anonymous and presented at an aggregated level, includes questions on employee engagement, inclusion and diversity, the psychosocial and physical work environment, and adherence to our values. It also features open-ended questions for general feedback.

After each employee engagement survey, we evaluate the results and establish action points based on employee feedback. We also review and adjust the survey questions as needed. Engagement with our workforce is otherwise followed up on an ongoing basis. The HR Director is responsible for ensuring that engagement happens and that results inform our approach.

Every office has a safety representative, and we also have a main safety representative and an employee representative. These representatives serve on the Working Environment Committee (WEC) alongside two management representatives. The WEC addresses matters related to the working environment, including HSE issues, safety inspections, and preventive measures. The committee meets four times a year, with additional meetings as needed. Employees can bring matters to the WEC through their safety representative.

We do not collect data on origin, religion, disability, or similar characteristics, ensuring that all employees can provide feedback on the same topics. Our statutory statement on equality and anti-discrimination details our work on equality, diversity, and inclusion, including goals for gender balance at various position levels, especially in top management.

S1-3: Processes to remediate negative impacts and channels for own workforce to raise concerns

We have not caused, contributed or been involved to any material negative impact on our workforce. Our whistleblowing routine, which is statutory for Norwegian companies, allows employees to raise concerns through a channel available in the employee handbook and via a link in our HR system. The details of this routine are described in the employee handbook.

In addition to the whistleblowing channel, we have regional HR personnel, safety representatives, and a Working Environment Committee (WEC). Employees can always speak to their regional HR person if they have questions regarding workplace conditions.

The HR Director is the sole receiver of concerns raised through dedicated digital forms. Reports can also be submitted in writing to an employer representative, safety representative, union representative, or lawyer. The recipient ensures the report is followed up and handled by the HR Director, who investigates within a reasonable time and informs the whistleblower of the outcome within 14 days. If the investigation takes longer than 14 days, the whistleblower is notified. Once the case is fully processed, the concerned individual(s) are informed of the outcome. If the whistleblower is anonymous, they will not be informed. The Personal Data Act is observed in processing all personal data, and confidentiality rules are strictly followed. The employer ensures the traceability of the whistleblowing process, including preparing minutes from interviews. All documentation is deleted in accordance with the Personal Data Act once it is no longer necessary.

The Norwegian Working Environment Act, chapter 2A, addresses whistleblowing provisions, and §4-1 requires the working environment to be “fully satisfactory” and safeguard employees’ physical and psychosocial health. Whistleblowers are protected against retaliation under §2A-2, which includes unfavorable treatment resulting from whistleblowing. Aider ensures the whistleblower’s working environment remains safe and appropriate, with follow-up meetings unless the whistleblower opts out or is anonymous.

S1-4: Taking action on material impacts on own workforce, and effectiveness of those actions

Our semi-annual employee engagement survey and formal employee-manager conversations are key platforms for identifying areas for improvement, preventing negative impacts, and promoting positive outcomes for our workforce.

Our employee and HSE handbooks outline routines, guidelines, and best practices. Our HR strategy and ongoing efforts aim to prevent and mitigate negative impacts while fostering positive conditions for our employees. We have no reports of serious negative impacts on employees.

We strive to create excellent working conditions, with office spaces designed for ergonomic comfort, including quality chairs and computer screens. Flexible working hours with core time allow employees to balance work and personal needs. We also hold digital company-wide meetings throughout the year to foster a sense of community and share important updates.

We celebrate initiatives like World Mental Health Day, Football Jersey Friday (organized by The Norwegian Childhood Cancer Society), and Pride, both in our offices and on social media. Additionally, we organize local social events and encourage sports activities, with some offices participating in events like the Holmenkollstafetten race.

The employee engagement survey addresses topics such as engagement, personal development, workload, inclusion, diversity, the work environment, and adherence to our values. It includes open-ended questions for general feedback, is anonymous, and results are presented in aggregate. Post-survey, we evaluate results, establish action points, and adjust future surveys as needed.

Our HSE Handbook includes emergency preparedness routines. Each office has a security representative and a regional HR representative available for various concerns. We have established ethical guidelines, which will be implemented in 2025.

We continuously focus on employee development, enhancing learning and development initiatives. The Working Environment Committee (WEC) meets regularly, and our HR department maintains a focus on employee well-being. Key resources managing material impacts include the HR Director, top management, the board, and the WEC.

Our transition towards a greener, climate-neutral economy has not negatively impacted our employees.

S1-5: Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The Working Environment Committee (WEC) plays a key role in setting and reviewing targets related to material impacts, as outlined in our HSE handbook. We regularly assess these goals and their attainment during WEC meetings.

Employee involvement is integral to this process, facilitated through our employee engagement survey and subsequent follow-up actions. After each survey, we evaluate the results, establish action points based on employee feedback, and review the survey questions to make necessary adjustments for future surveys.

S1-6: Characteristics of the undertaking’s employees

We have a total head count of 1271 employees, including 213 employees from acquired companies that have not yet been merged into Aider AS. Beside from the total head count, data in this report is based on a head count of 1058 employees, including 396 men and 662 women. Over the reporting period we have had an employee turnover rate of 15%. When excluding temporary employees, trainees and cleaning personnel, the turnover rate is 14% for the reporting period.

Throughout the year, Aider has acquired several companies. Our analysis includes employee data from Aider AS, Aider Sørøst AS, and Causa Nord AS in all data fields in S1. Contractors are excluded from this data. Employee numbers are reported as head count at the end of the reporting period. Employee data is extracted from our HR system, which continuously tracks all registered employees and any changes.

The number of non-guaranteed hours employees, part-time employees, and temporary employees includes several cleaning personnel and trainees who work as needed or for a limited number of hours per week.

Characteristics of Aider's employees by contract type and gender (head count)	Male	Female	Other	Not disclosed	Total
Number of total employees	491	780	None	None	1271
Number of employees not yet merged	95	118	None	None	213
Number of employees merged into Aider AS	396	662	None	None	1058
Number of permanent employees	392	658	None	None	1050
Number of temporary employees	4	4	None	None	8
Number of non-guaranteed hours employees	30	32	None	None	62
Number of full time employees	352	563	None	None	914
Number of part time employees	44	99	None	None	144

S1-9: Diversity metrics

The gender distribution at top management level is 83 men and 39 women. The top management level includes the position levels Partner and Director. The age distribution shows that 26% of employees are under 30 years old, 48% between 30-50 years old and 25% over 50 years old.

Distribution of employees (head count)	Under 30 years old	Between 30 and 50 years old	Over 50 years old
Male	12 %	17 %	9 %
Female	14 %	32 %	16 %
Other	None	None	None
Not disclosed	None	None	None

S1-10: Adequate wages

Salaries are set locally based on market conditions, and we do not follow national benchmarks, but adapt to competitive wage levels in relevant markets.

S1-11: Social protection.

All employees are covered by The Norwegian National Insurance Act (Folketrygdloven) for various benefits. Under Chapter 8, employees under 67 years are entitled to full sickness benefits for up to 52 weeks, those aged 67–70 years are entitled to sickness benefits for up to 60 days provided they have earned pensionable income, and employees over 70 years are not entitled to sickness benefits from the National Insurance Scheme.

Chapter 4 covers unemployment benefits, with conditions for entitlement detailed in the legal text.

All employees are also covered by occupational injury insurance through the employer's insurance policy. Additionally, they are covered by Chapter 12 for disability benefits, Chapter 8 for sick pay, and Chapter 11 for work assessment allowance, when conditions are met.

Chapter 14 ensures all employees are covered for parental pay. Chapters 19 and 20 cover retirement pensions, and employers are required to establish pension schemes according to The Act on Mandatory Occupational Pension (OTP Act), The Act on Corporate Pensions (Foretakspensjonsloven), and The Act on Defined Contribution Pensions in Employment (Innskuddspensjonsloven).

We comply with all the legal requirements mentioned above.

S1-12: Persons with disabilities

We do not collect data on employees' disabilities, in line with the Equality and Anti-Discrimination Act.

S1-13: Training and skills development metrics

The average number of training hours per employee is 60.73 hours for men and 53.62 hours for women.

The most important training in our company takes place through day-to-day work with customers, tasks and colleagues. We work actively using the work situation as an arena for learning. There are also formalized programs for courses and training and the employees are encouraged to ensure ongoing professional development through the internal course offering. We have therefore based this measurement on hours registered on the time code for courses and academic update.

S1-14: Health and safety metrics

All employees are covered by our health and safety system, which is based on legal requirements for statutory occupational injury insurance and recognized guidelines. In 2024 we have no fatalities or work-related accidents

S1-15: Work-life balance metrics

100 % of our employees are entitled to family-related leave through The Norwegian National Insurance Act (Folketrygdloven) when becoming a parent. This was relevant for and exercised by 6.72% of the total workforce, of which 43 % were men and 57 % were women. In total this was 60 people.

S1-16: Remuneration metrics

The ratio of the contractual annual salary of the CEO to the median contractual annual salary for all employees was 3.6. We have a higher share of men in the top management level, and a higher share of women in the associate and middle management levels. The salary ratio with a split on employee categories, are shown in the following table.

Employee category	Salary ratio (salary for women / salary for men).
Associates and Senior Associates	1.04
Managers and Senior Managers	0.93
Partners and Directors	0.96

At Aider we are clear that equal work should be remunerated equally in the local markets. We do not accept any discrimination or unjust remuneration. Differences typically arise with different work and educational backgrounds, competencies, department affiliation (accounting, payroll, advisory or tech), areas of responsibility, gender distribution across position levels or employee categories, and geographical differences. These factors can explain the majority of the gender pay gap.

This analysis was done on the basis of our salary system, where all current employees are registered, and was calculated based on all employees working more than 50%.

S1-17: Incidents, complaints and severe human rights impacts

During the reporting period, we received one complaint through our whistleblowing channels. This was handled according to our routines. No serious human rights violations or incidents related to the workforce have been reported, nor have we received any fines or penalties. Our HR director is responsible for following up any reported incidents or complaints. We have also conferred with our CEO on this topic. The routine for filing complaints is described in S1-3 above.

GOVERNANCE INFORMATION

G1: Business Conduct

The Board of Directors holds overall responsibility for Aider's business conduct, overseeing ethical practices, compliance, and risk management. Governance of business conduct is integrated into strategic decision-making to ensure adherence to anti-corruption measures, supplier due diligence, and ethical guidelines. See governance chapter as part of ESRS 2 for more information about Aider's management.

G1-1 Business conduct policies and corporate culture

Aider builds its business on a strong value base, prioritizing people and maintaining high ethical standards. Our corporate culture is rooted in our employee handbook, which includes our core values, Code of Conduct, and internal responsible business practice procedures. Compliance with the Anti-Money Laundering Act and regulations related to corruption is integrated into our onboarding and continuous training.

To ensure transparency and compliance, we have a whistleblowing system that allows employees to report concerns anonymously if needed. The HR department handles whistleblowers, protects them from retaliation, and ensures all cases are managed confidentially and objectively. The whistleblower procedure is described in S1-3.

Aider complies with national Norwegian laws, including the Whistleblowing Act, Working Environment Act, and Money Laundering Act, as well as EU regulations such as Directive 2019/1937 on Whistleblowing. We also adhere to the Norwegian regulation for accounting, the GRFS, and the Norwegian accounting act. These regulations require us to maintain transparent and protected channels for employees to report concerns, safeguard whistleblowers from retaliation, and ensure compliance with ethical and legal standards, particularly in accounting and consulting work.

We have zero tolerance for corruption, bribery, extortion, fraud, and money laundering, as clearly formulated in our Code of Conduct. Additionally, we follow the ethical guidelines established by our industry organization, Regnskap Norge, specifically for accountants. We believe these measures are sufficient to prevent both internal and external corruption and bribery.

Beyond what is stated in the employee handbook, more comprehensive training is provided within each consulting department, tailored to their specific fields. These training sessions are mandatory for all new employees and vary in frequency depending on the department. The functions most at risk are our accounting personnel who work directly with our customers' financials and accounting.

G1-2 Management of relationships with suppliers

Aider places great importance on maintaining strong relationships with our partners and suppliers. We ensure timely payments through well-established and efficient payment procedures, which are regularly monitored for compliance. Our approach to suppliers aligns with the Norwegian Transparency Act. See subchapter GOV-4 for more information about due diligence in relation to our suppliers.

Our procurement policy governs supply-side contractual partners and sets expectations for both social and environmental sustainability. We have a clear authorization matrix regulating who can perform purchases and have developed a Supplier Code of Conduct to guide our interactions.

G1-3 Prevention and detection of corruption and bribery

As a leading player in accounting and consulting services, we comply with extensive anti-money laundering regulations. All employees, regardless of position, participate annually in anti-money laundering training, including measures to uncover suspicious transactions related to corruption and financial crime.

In 2025, we implemented a new ethics policy that reinforces our zero tolerance for corruption, bribery, extortion, fraud, money laundering, and other unethical practices. All incidents related to corruption and bribery are handled through reporting routines described in the employee handbook, with HR as responsible for follow-up. Reported cases are escalated to regional or national management bodies if necessary.

Aider's anti-money laundering policy is available on the intranet, where all employees are required to familiarize themselves with relevant policies as part of the onboarding process. Anti-money laundering and GDPR training is mandatory for all employees. By December 2024, 100% of all employees had completed the necessary training.

G1-4 Incidents of corruption or bribery

Aider is committed to dealing with cases of corruption or bribery in a prompt, independent and objective manner. Our whistleblowing channel ensures that concerns can be reported anonymously, and HR acts as an independent body in the investigation of such cases. As of December 2024, we have no convictions nor fines for violation of anti-corruption and anti-bribery laws.

All employees have completed a 2-hour computer based mandatory anti-money laundering and GDPR training, but there are currently no dedicated training modules for corruption prevention beyond this.

G1-5 Political influence and lobbying activities

Aider has no political advocacy or lobbying activities. Any public advocacy lies with the company's CEO, and our industry association, Regnskap Norge, which acts as our voice in regulatory matters. We do not make financial or non-financial contributions to political parties or organizations.

Furthermore, none of our management members have held positions in public administration in the last two years prior to joining Aider.

G1-6 Payment practices

Aider maintains efficient payment routines to ensure timely payments to our suppliers. The average payment time is 18 days.

We operate with standard payment terms of 30 days for large suppliers and 15 days for small and medium-sized suppliers. As of today, 83% of our payments are in accordance with these terms. We have 0 outstanding legal proceedings for late payments.

Our payment practices are taken directly from the ERP system Xledger, and we closely follow-up payment routines to ensure stability and good relationships with our suppliers.

APPENDIX

ESRS INDEX

This is an index showing how the various detailed requirements in the ESRS have been addressed in our sustainability report. The overview has been prepared by the European Financial Reporting Advisory Group (EFRAG). All non-material and voluntary requirements that have not been addressed have been removed from the overview to reduce the number of listed requirements.

ESRS Standard	ESRS Reference code	Discolure Requirement	Page number
ESRS 2	BP-1	General basis for preparation of the sustainability statement	41
	BP-2	Disclosures in relation to specific circumstances	41
	GOV-1	The role of the administrative, management and supervisory bodies	42
	GOV-2	Information provided to, and sustainability matters addressed by the administrative, management and supervisory bodies	42

Status measures from 2024

Action Area	Explanation	Status as of Jan 2025
General		
Implement Environmental KPIs for Management	- Integrate environmental considerations as part of the company's governance parameters	To be discussed with new owner
Formalize Quality Management	- Integrate ESG considerations when establishing the audit committee	The audit committee will approve the sustainability report
Climate Change		
Implement Travel Policy	- Improve procedures for booking necessary travel	Travel policy approved
Implement Procurement Policy	- Purchase climate-friendly products and services	Procurement policy approved
	- Improve supplier overview and procurement control	Supplier Code of Conduct policy approved
Ensure Waste Management Quality	- Ensure sorting in accordance with the Waste Regulations at all offices	Secured at the largest office in Oslo, overview obtained for most other offices. Information posted on intranet about the Waste Regulations.
Technical Solution for Extracting Travel Data	- More granular and precise data	Not started, continued into 2025
Social		
Implement Supplier Code of Conduct and Procurement Policy	- Strengthen work on the Transparency Act and due diligence assessments in the supply chain	Supplier CoC and procurement policies approved
		Internal Code of Conduct/ethical guidelines approved
Business Conduct		
Extended Training on GDPR and Anti-Money Laundering	- Update training materials related to anti-money laundering and handling GDPR considerations	All employees completed digital training in 2024
	- Review the current status of all our services	

Taxonomy KPI Tables

KPI TABLE 1 - TURNOVER

Financial year 2024	Year			Substantial Contribution Criteria						DNSH criteria ("Does Not Significantly Harm")						Minimum Safeguards (17)	Proportion of Taxonomy-aligned (A.1.) or -eligible (A.2.) turnover, year 2023 (18)	Category (enabling activity) (19)	Category (transitional activity) (20)

B. TAXONOMY-NON-ELIGIBLE ACTIVITIES

OpEx of Taxonomy-non-eligible activities	9 478	98,6%
TOTAL	9 610	100 %

Other tables:

TABLE 1: MATERIAL TOPICS

Theme	Sub-theme	Impact materiality	Financial materiality Impacts
E1 - Climate Change	E1 -Climate change adaption	Material	Not Material
S1 - Own Workforce	S1 - Working conditions	Material	Material
	S1 - Other work-related rights	Material	Not Material
G1 - Business Conduct	G1 - Corporate culture	Material	Material
	G1 - Management of suppliers	Material	Not Material
	G1 - Political engagement and lobbying	Material	Not Material
	G1 - Corruption and bribery	Material	Not Material

TABLE 2: BIGGEST NEGATIVE AND POSITIVE IMPACTS, AS WELL AS OUR MOST FINANCIALLY MATERIAL IMPACTS

Nr	Biggest Negative Impacts	Biggest Positive Impacts	Most Financially Material Impact
1	Employee commuting	Our services help provide information to the markets	Purchase of goods and services
2	Company mandated overtime	Good payment routines	Company mandated overtime
3	Purchase of goods and services	Sector with mandated training; focus on development; hiring of inexperienced candidates	Good salary routines
4	Electricity usage	Good salary routines	Performing OECD Due diligence
5	Purchase of IT-products	memberships in Regnskap Norge and partaking in other public forums	Acquiring a lot of smaller companies
6	Waste generated in operations	Our sustainability advisory services	Electricity usage
7	Employee travel	Good employee handbook	Our sustainability advisory services
8	Aquiring a lot of smaller companies	Equal pay for equal work policy	Equal pay for equal work policy
9	Purchase of software	Performing Due Diligence	Sector with mandated training; focus on development; hiring of inexperienced candidates

TABLE 3: ENERGY USE MIX

Energy use mix	kWh	% of total consumpti on
Fuel consumption from coal and coal products	None	
Fuel consumption from crude oil and petroleum products	None	
Fuel consumption from natural gas	None	
Fuel consumption from other fossil sources	None	
Consumption of purchased or acquired electricity, heat, steam or cooling from fossil sources	94 541	
Total energy consumption from fossil sources	94 541	3%
Total energy consumption from nuclear sources	54 134	2%
Fuel consumption from renewable sources	None	
Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources	2 971 488	
Consumption of self-generated non-fuel renewable energy	None	
Total energy consumption from renewable sources	2 971 488	95%
Total energy consumption related to our operations	3 120 164	100%
